MELAG

MELAQUICK

Autoclave

Big on the inside.

Small on the outside.

The fast autoclave helps to save time and money in legally-compliant reprocessing. This is because handpieces, prophylaxis instruments and other common instruments can be sterilized between patient treatments.

Sterilization in record time

Handpieces and turbines, prophylactic instruments and other conventional practice instruments (as long as 20 cm) can be sterilized between treating patients, in only about 7 minutes

Compact device design

for a significantly smaller footprint

Individual drying system

with drying pump or compressed air connection

Highest user friendliness

with MELAG 4-key concept and digital tools

Quality made in Germany

developed, designed and produced in Berlin

Maximum process safety

through integrated interface for documentation

SAVE 60%
