Geistlich

Bio-Oss Spongy Granules

- Bovine xenogeneic bone graft substitute
- Very similar to human bone in its structure and chemical make-up
- The biofunctional biomaterial aids vascularisation and the formation of new bone

GEIS-022 0.25-1mm 0.5g
GEIS-022A 0.25-1mm 2g
GEIS-022B 1-2mm 0.5g
GEIS-022D 0.25-1mm 0.25g
GEIS-022H 0.25-1mm 1g

The Safescraper® Twist (pack of 3)

- Accelerates harvesting time
- Excellent control during the harvesting procedure
- Effective on any bone surface (plane, concave, convex)
- Collects bone shavings of appropriate size and thickness for graft integration
- Bone shavings contain well-preserved bone cells, particularly osteocytes, osteoblasts, osteoclasts and osteoprogenitor cell

GEIS-023K

Bio-Gide One Unit Membrane 25 x 25mm

- Leading collagen membrane for oral tissue regeneration
- Used in combination with a bone substitute such as Geistlich Bio-Oss® or Geistlich Bio-Oss® Collagen
- Due to its bilayer structure, the membrane not only prevents ingrowth of soft tissue into the augmented site, but also acts as a guide for the appropriate cascade of bone, soft tissue and blood vessel development

Bio-Gide One Unit Membrane 25 x 25mm

Geistlich Bio-Gide® Perio has the same biological properties as Geistlich Bio-Gide® but has a smoothed upper surface.

This slows the absorption of moisture. Particularly in periodontal indications, this offers the practitioner a longer time window to enable exact positioning of the membrane, especially in the interdental space.

GEIS-025A - PERIO ONE MEMBRANE/4 TEMPLATES 16 x 22mm

Vivida Home Kit 6% HPS

Only 15-30 min treatment time for your patients.

- HPS Unique Formula – Ensures Less Hypersensitivity
- Smooth viscosity
- Convenient Solution for you and your patients

AccuFab-F1

Dental 3D Printer

Embrace the Future

SHI-C9906

Introductory price €7,199

Faster Printing Speeds

Maximize efficiency with cutting-edge high-power optical machines to ensure consistent accuracy, significantly reducing printing time. Experience the remarkable speed, especially for high-viscosity resins, reducing turnaround times without compromising quality.

Intelligent Sensing

The printing platform, resin tank, and optical machine feature automatic detection to monitor missing components or residues in real-time, providing clear touchscreen prompts for error-free operation.

Perfect for Hyperclear Print

Thanks to the printer's special HyperClear resin tank, AccuFab-F1 excels at producing hyperclear print. This unique capability ensures superior transparency and durability, making it the ideal solution for protective and therapeutic dental appliances.

Quick-Release Tank Film

The resin tank's three-buckle filter membrane design enables rapid disassembly and assembly, enhancing efficiency and saving the cost.

VITA ENAMIC®

Unique hybrid ceramic with a dual ceramic-polymer network structure available as monochromatic and multichromatic types in up to three translucency levels (T, HT, ST)

Fabricating durable restorations

Using a high-load capacity hybrid ceramic with absorption of masticatory forces

Hybrid ceramic enables reduced wall thickness

Compared to feldspar ceramic, making non-/minimally invasive restorations possible.

Fabricating accurate, precise and delicate structures

Using a hybrid material with reduced brittleness

Cost-effective reconstruction

Thanks to time-saving CAM fabrication and efficient polishing without any firing process
